

## iOS Engineer

American Well, a national leader in the rapidly growing field of telehealth, seeks a highly motivated and professional iOS Engineer. We partner with the top health systems, health plans, employers, and digital health companies to deliver video doctor visits over mobile and web. We are changing the way healthcare is delivered by enabling every doctor to use telehealth with their patients, making care more accessible, affordable and convenient. Our goal is to bring care home.

### **Brief Overview:**

The iOS Engineer will play a critical role on the Engineering team, working on a technology that is re-inventing healthcare as you know it today. Specifically, the iOS Engineer will have a passion for mobile development. You recognize the importance of getting the details right. You want to build products that not only are appealing but that also make a big difference on the quality of people's lives. We need people just like you as we continue to expand our portfolio of iOS applications.

Our iOS engineers need to be expert iOS coders.

### **Core Responsibilities:**

- Design, implement and maintain iOS applications using REST web services
- Responsible for architecting, developing, and supporting American Well's iOS Telehealth product
- Conducts analysis of organizational needs and goals for the development and implementation of the product
- Able to work independently on compressed schedules in a fast paced environment to meet demand.
- Recognizes process or programming inefficiencies, and recommends improvements.

### **Qualifications:**

- Minimum 2 years' experience building mobile apps using the iOS SDK and XCode.
- BS/MS in Computer Science or equivalent.
- Experience in mobile interface design and development
- Experience with Cocoa / UIKit
- Experience completing an application and seeing it through full life cycle of development
- Experience with Cocoa/UIKit
- Have shipped at least one iOS app – the more sophisticated the better
- Understand XCode
- Comfortable working in a team environment
- Proven track record to deliver solutions on time
- Strong in communication and documentation

### **Your Team:**

Should you join American Well and the Engineering team, you can expect:

The development organization is a multi-disciplinary team of engineers dedicated to creating a state of the art TeleHealth experience on every platform we can get our hands on. Our cross-functional teams follow a pragmatic Agile methodology as we balance feature requests, strategic initiatives, tech debt, and exciting partnerships on the path to delivering a market leading product

to a quickly growing customer base. We work hand in hand with the whole American Well organization to ensure that our product meets the needs of all of our users.

Whether you're an advocate for the latest and greatest iOS and Android features, are committed to the ideal back-end architecture, or are dedicated to providing the best web usability, we have a place for you on our team.

### **Working at American Well**

American Well is changing how care is delivered through online and mobile technology. We make online doctor visits accessible to everyone for one-off care issues like colds or infections, and chronic condition management, such as diabetes or depression. We make the hard work of healthcare look easy and that requires a mission-driven mentality. We're a "go getter" culture that pride itself on smarts, initiative, creative thinking, and a strong work ethic.

Our corporate headquarters are located in downtown Boston at 75 State Street –in the heart of the city. In addition to the opportunity to build the future of healthcare technology and a great location, we offer:

- Three weeks of vacation time
- 401K match
- Competitive healthcare, dental and vision insurance plans
- Free gym access – on-site
- Drop-off/pick up dry cleaning service
- Prime office space with views overlooking all of Boston
- Complimentary snacks and drinks
